TASK:

Create a custom chatbot using Langchain:

1. Extract data from https://brainlox.com/courses/category/technical using URL loaders from Langchain
2. Cerate embeddings and store it in a vector-store
3. Create a FLASK RESTFUL API to handle the conversation

Submission:

1. Create a public GitHub repo and push your code there and share the Github repo url.
2. ONLY SUBMISSIONS ON GITHUB WILL BE ACCEPTED.
